

Glass Resin Body Coating

*Glass barrier keeps your car
shining beautifully all the time*

KYOWA SHOKO

*Hardness 6H
Thickness 2.5 μm
Shines for a long time*

**Generally new car's clear paint is 1H hardness.*

"AQuly" glass resin body coating is newly introduced to car coating market for more customer's satisfaction by everlasting effects to keep the best shining body condition.

*AQuly coating-
Hard,
Thick &
Everlasting*

Hardness

AQuly's hardness is 6H and it has similar compotion to glass. It prevents scratch and color fading by ultra-violet light. General glass coating is too hard and has crack or stain problems. "AQuly" has overcome such problems with hardness control technology.

Thickness

AQuly's 2.5 μm of glass resin film covers and protects car body paint, window glass, metal or plastics parts.

Keep shine

AQuly makes protective barrier on car body paint and keeps new car's shining for a long time.

Whole body coating

Can apply to body, window glass, tire wheel, bumper etc. Plastics can be coated as well.

*Selectable
Super water repellent
Super hydrophilicity*

Two different type of conditioner is prepared for maintenance. Depending on car owners' favour, finish is selectable. Super water repellent or Super hydrophilicity.

AQuly Glass resin coating protects Car Body!

Comparison before and after AQuly

Easy maintenance!!
AQuly keeps new car's shine for a long time.

Comparison, AQuly and other coatings

- Very good - Good - Not so good × - Bad

	Heat resistance	Weather resistance	Electrical insulation	Water repellency	Adequate hardness	Clarity
AQuly

Silicone type		×				
Organic polymer	×	×			×	

Customer's response, *AQuly*

AQuly has been highly appreciated by customers since introduced.

User reports, *AQuly*

Customers are totally satisfied with AQuly glass resin coating.

The shining body after rain is very beautiful.

I was surprised that even after rain, the car body with AQuly is strong against getting dirty.

I heard that AQuly has self-cleaning function which is the effect that rain washes away dirt and dust from the body.

Water on body also flows well. My car looks shining more than ever.

Man 58 y.o.

Totally different from any of those existing coatings.

AQuly, I just have had on my car, is totally different from other coatings.

I am satisfied very much with shine and gloss of AQuly.

I feel very happy also because AQuly lasts for a long term.

Man 33 y.o.

My car parked at open air space, gets less dirt and dust.

I chose AQuly because I bought a new car and must park in an open air parking space.

I like AQuly because it protects my car from dust and dirt.

Even after rain, my car looks beautiful.

I also feel good with AQuly and its easy maintenance methods.

Woman 21 y.o.

Tell me about maintenance products line-up

The following products are exclusively for AQuly maintenance

Conditioner
Super water repellent

Maintenance conditioner made of silica type glass polymer with specially designed water repellent effect added.

Conditioner
Super hydrophilicity

Maintenance conditioner made of silica type glass polymer with specially designed hydrophilicity effect added.

Removes metal powder, pitch or tar attached on car body.

Tell me how to use the maintenance products

Please use "Conditioner" and "Cleaner".

***How to use "Conditioner"**

- 1) Wash body with water to remove dust or sand
- 2) Shake "Conditioner" well before use
- 3) Dry body surface after washing.
Spray "Conditioner" on AQuly coating and spread evenly with "AQuly cloth".

*Please spread immediately after spray "Conditioner".
(Unless otherwise, risk of uneven finish by heat.)

***How to use "Cleaner"**

- 1) Wash body with water to remove dust or sand
- 2) Dry body surface after washing.
Apply "Cleaner" on stains, small scratches and rub with sponge.

When need to do maintenance?

Once or twice a month, wash by water and finish with "Conditioner"

Washing is needed once or twice a month, only with water, especially after rain.
If any stain or strong dirt, use "Cleaner".
"Conditioner" is needed only once a month or two month. Apply after washing.

Q Tell me about car wash

A When car wash, use a water hose and wash with streaming water

Please wash in order as follows- (1) roof (2) bonnet (3) side body (4) tire wheel. Drying step also follows the order.

***Please avoid washing under the burning sun.**

***Please wash with tap water. (Well water or industrial water may cause water spots.)**

Q Can I use washing machines?

A Please do not use.

AQuly coating has tough film of 6H hardness, however washing machine's brush or sand on body may cause small scratches on surface.

***Once a month usage may be ok.**

***Recent cloth type washing machines or non-brush type are ok.**

Q How to remove stains, scales or birds' droppings.

A Firstly wash with water. If remains, use "Cleaner".

***Usage of "Metal remove clay" is also effective.**

Q How to remove water spots.

A Water spots may happens when drops of water on water-repellent surface dry. In most cases, they can be removed by washing with water or wiping with wet clothes. If remain, use "Cleaner" or "Metal remove clay".

Q How to prevent water spots.

A

- 1) In case of dark color cars, shorter interval of washing in summer.**
- 2) Try to find in earlist timing. If any, wash it as soon as possible.**
- 3) Dry well after each washing.**
